SHUBHAM KOURAV

Senior SDET | Test Automation Engineer

Vadodara, Gujarat | +91-8982976179 | sk8982976179@gmail.com | linkedin.com/in/qashubham

PROFESSIONAL SUMMARY

Test Automation Engineer with 5 years at Rishabh Software, delivering automation solutions for VIOOH, a global Out-of-Home (OOH) advertising platform running programmatic digital billboard campaigns across 10 countries. Strong background in both manual and automated testing, managing multiple concurrent project schedules across 3 Agile squads. Built and owns a 500+ test case automation framework with 90% regression coverage for Java-based cloud-native microservices. Deployed 100+ UiPath RPA workflows saving 75+ hours per month. Reduced release cycle time by 40% through CI/CD-integrated automation. ISTQB CTAL-TAE certified. Flexible with global team collaboration.

KEY SKILLS

Test Automation: Selenium WebDriver, Playwright, TestNG, JUnit, BDD Cucumber, Page Object Model

Testing : Manual , Regression , Functional , Performance Testing and API Testing , AI & Prompt Testing

API Testing: RestAssured Java, Postman, REST APIs, Data-Driven Testing, API Automation

RPA: UiPath Studio, UiPath Orchestrator, Bot Development, Exception Handling, ERP and CRM Integration

Languages: Core Java, JavaScript, MySQL

CI/CD and DevOps: Jenkins, GitHub Actions, CodeFresh, Maven, Gradle, Git

Tools: JIRA, Retool, GitHub, MySQL ,SQL Server, Oracle, Jmeter

Domain: Out-of-Home Advertising, Programmatic DOOH, Campaign Delivery, Inventory and Booking Platforms

Methodologies: Agile, Scrum, SDLC, STLC, TDD, BDD ,

PROFESSIONAL EXPERIENCE

Senior Test Automation Engineer

Rishabh Software Pvt. Ltd. | Vadodara, Gujarat

March 2021 - Present (5 Years)

Client: VIOOH - Global Out-of-Home Advertising Platform | Programmatic DOOH | Campaign Management | Inventory and Booking

Test Automation and Framework Development

- Managed concurrent testing schedules across 3 Agile squads and 5+ microservices, prioritizing regression, integration, and exploratory testing based on release cycles and business priorities.
- Architected and own a 500+ test case Selenium and Java automation suite using BDD Cucumber and Page Object Model, achieving 90% regression coverage for VIOOH campaign delivery and inventory booking microservices.
- Integrated full automation suite into Jenkins, CodeFresh, and GitHub Actions CI/CD pipelines, cutting release cycle time by 40% and enabling same-day regression feedback for each product release.
- Led code reviews for a 5-member QA team, enforcing coding standards and reducing script flakiness by introducing stable locator strategies and retry mechanisms.
- Spearheaded the strategic migration of legacy Selenium test suites to **Playwright**, improving execution speed by 35% and enabling cross-browser parallel runs on complex campaign bidding flows.
- Leveraged generative AI tools to accelerate basic testing workflows, including using AI to generate boilerplate Playwright automation scripts and draft complex synthetic test data.
- Embedded QA into Sprint Planning and Retrospectives across 3 Agile squads, reducing escaped defects to production and shifting defect detection earlier in the SDLC.

API Testing and Automation

- Designed RestAssured Java API automation framework for VIOOH REST APIs covering authentication, authorization, campaign creation, bid request and response validation, and negative testing scenarios.
- Integrated API automation into CI/CD pipelines for early defect detection, reducing production API bugs by 30% across 5 quarterly releases.
- Built internal QA dashboards using Retool and JavaScript for real-time API monitoring, test data verification, and campaign delivery validation across OOH media partners.

Quality Assurance and Collaboration

- Collaborated with VIOOH product owners, developers, and business analysts to define test strategies for programmatic DOOH features including SSP and DSP integrations and audience targeting modules.
- Tracked and resolved 200+ defects in JIRA across 5+ product releases, with zero critical escaped defects in the last 3 consecutive quarterly releases.

KEY PROJECTS

Campaign Automation Test Suite | *OOH Advertising | VIOOH*

Stack: Playwright ,Selenium WebDriver, Java, Cucumber BDD, Jenkins, GitHub Actions

End-to-end automated regression suite for VIOOH campaign creation, inventory booking, and bid management platform covering 500+ test cases across 10+ microservices with CI/CD integration for continuous regression.

Outcome: 90% regression coverage | Release cycle time reduced by 40%

RPA Finance Operations Bot Suite | *Finance and Back-Office | VIOOH*

Stack: UiPath Studio, UiPath Orchestrator, SQL Server, Oracle, REST APIs

Suite of 20+ attended and unattended bots automating invoice processing, campaign delivery reconciliation, and ERP data sync for VIOOH finance operations team.

Outcome: 75+ hours per month saved | 60% reduction in manual processing time

API Automation Framework | *Programmatic DOOH | VIOOH*

Stack: RestAssured, Java, Postman, Retool, Jenkins

Designed and implemented API test automation framework validating VIOOH REST APIs for campaign bidding, audience targeting, and OOH media partner integrations, fully integrated with CI/CD pipelines.

Outcome: 30% reduction in production API defects across 5 quarterly releases

CERTIFICATIONS

- **Google AI Professional Certificate** – Google [Professional certificate]
- **ISTQB CTAL-TAE - Certified Tester Advanced Level Test Automation Engineer** - ISTQB [Advanced Level]
- **ISTQB CTFL - Certified Tester Foundation Level** - ISTQB
- **Software Testing and Automation** - University of Minnesota
- **UiPath RPA Developer Foundation v2020.10** - UiPath

EDUCATION

Bachelor of Computer Application (BCA) - Computer Science

Rabindra Nath Tagore University, Bhopal | June 2019
